

KLOEPFEL RECRUITING

We'll find the right employees for your business

The challenge

Every company is special in its own way and so every company needs to fill its vacancies accordingly. We understand this and look at each industry individually for the right requirements in the following areas:

- Supply Chain Management
- Automotive
- Logistics
- Pharmaceuticals
- Interim management
- Trade
- Indirect procurement
- Mechanical and plant engineering
- Medical technology

Process management

Requirement analysis

In order to find the right candidate for your company, we first look at your requirements. You tell us your expectations and demands and we'll make sure to compile a suitable shortlist of candidates.

Candidate search

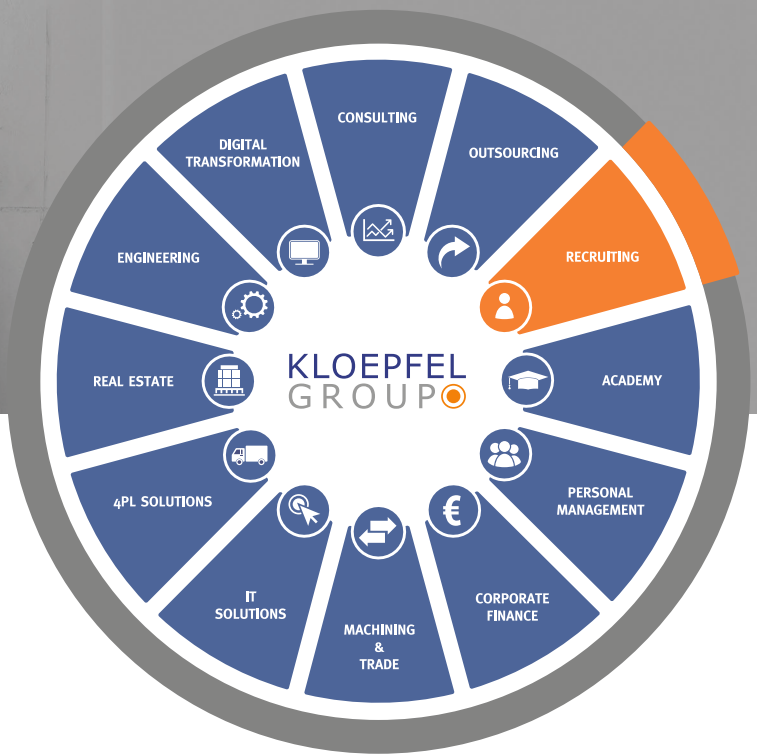

When looking for the right candidates, we'll use our exclusive pool of candidates and will contact individuals from specific sources.

Selection procedure

Before presenting any candidate to you, applicants must go through a multi-step process. We'll turn a generic CV into a person with an interesting professional background, which we can pass on to you in advance, so that you already have an idea about the candidate.

Preparing your new employee

Our job isn't over once we present you with your candidates. We will guide you through the application process and keep you constantly updated. That way you'll always know what is going on with your applicants and how to get them to join your team.

First candidate profile within

**10
days**

We'll give you a choice of

3

profiles

2 of 3

applicants make it to the interview

We'll make sure applicants feel

connected

to your

team by preparing them accordingly

Contact

Especially as a company is, so especially his vacancies must be occupied.
